

somerset enhanced

Overview

St Cuthberts Mill enhanced their traditional printmaking paper Somerset with a special ink receptive coating to create the beautiful and revolutionary Somerset Enhanced fine art inkjet paper. This is the original, and what quickly became the benchmark of this class of high quality inkjet paper.

Product Description

Somerset Enhanced is made from 100% cotton, to give a sheet made with one of the purest forms of cellulose. Mould made using traditional methods; this exquisite paper has a high whiteness without unnecessary use of optical brightening agents (OBA). An archival grade paper buffered with calcium carbonate to combat acid attack finished prints may encounter from air pollution. Prints have excellent tonal separation throughout the range, minimal ink spread and are almost instantly touch dry. Somerset Enhanced is excellent for fine art photography and fine art reproduction.

Surfaces

All three surfaces have a delicate random surface texture created using natural woollen felts.

Satin - slightly textured surface finish

Velvet - velvety mid textured surface

Textured - highly textured with many peaks and troughs

Physical Characteristics

Material: 100% Cotton

Whitness: 96.9% (TAPPI Method)

Brightness: 97.0%

Paper colour: Radiant White

pH value: 7 - 9

- ✓ Mould made traditional artist paper
- ✓ 100% Cotton
- ✓ Natural woollen felt textured
- ✓ Calcium carbonate buffered
- ✓ Acid free & archival

Printer Compatibility

Specially engineered for inkjet printing. Suitable for use with most photo quality inkjet printers. For fade resistant prints pigment inks are recommended. Blue Wool Scale in excess of 6 achieved using pigment inks.

Reliable Quality

Rigorous quality control checks are routinely carried out during every making to ensure the paper is made to the highest standard. Somerset Enhanced is Fine Art Trade Guild approved in 255g/m². St Cuthberts Mill's quality is regulated by ISO9001:2000.

Handling

Handle the paper only by the edges and avoid touching the coated surface. Do not expose the paper to extremes of temperature, humidity, harsh chemicals or adhesives. Ensure prints are thoroughly air dried before storage.

Award Winning Paper

Somerset Enhanced has won awards from the BIPP (British Institute of Professional Photography), as well as 'Best Buy' and 'Highly Recommended' awards from the UK's leading Pro/Am magazines, namely Practical Photography and Digital Photo respectively.
